## **PURE OXYGEN ULTRA SHAMPOO DILUTION RATE**

Pure Oxygen ULTRA Shampoo is designed to be rinse free. When an animal is washed using the shampoo, do not rinse it off. It will help reduce the risk of skin conditions.

When used at stronger dilutions it will assist with a host of fungal and bacterial conditions and help the healing of small wounds. Ensure that the solution is sprayed onto the affected area right down to the skin, then leave to air dry.

<b>CONDITION</b>	<b>DILUTION</b>
Animal Bathing	12.5 ml per litre of Water – do not rinse off
Animal Bedding	Wash with normal laundry powder plus half a cup of Pure Oxygen ULTRA Shampoo
